

Design

The Titan32 Basket Stretcher has all of the main features of the Titan Series Stainless Steel basket stretchers including SträtLoad™ Attachment Points, but is made specifically to deal with larger patients. Measuring 32 inches wide, it gives extra room for those special cases where the size of the patient dictates a different approach in handling.

As with the other Titans, the Titan32 is rated to 2500 lbs, and is made entirely of stainless steel. The Back Supports span the entire length of the stretcher (between the cross-braces) and are also made of powder-coated stainless steel in order to give the additional support that will be needed in that area.

As with all of the Titan Series Basket Stretchers, the Titan32 is designed to surpass the US Military's MIL-L-37957A, January 24, 1992 specification, **in terms of its strength** but not in its design. All testing has been completed at an independent facility, and are proven to surpass this specification.

Unique features include a 25.4mm (1 inch) top-tube to make it easy to hold onto relative to smaller-tube frames. It also comes with four patent-pending SträtLoad™ Connectors that make it quick, easy and safer to clip your Litter Bridle into. These connection points protect the carabiner from wall and rock faces etc. The Durathene netting allows water and air to easily pass through the patient compartment, yet the small holes keep from snagging debris as easily. The Durathene material will not rust and potentially cause additional harm to your patient, and they are attached with shock cord so they will give-way when loads are improperly placed on it.

Tested to and beyond a 1,134 kg (2500 lb.) static load test threshold, users can be ultimately confident in their use of any of the Titan Series Baskets Stretchers.

Features

- **SträtLoad™ Feature as Standard**
- **Stainless steel Back Support slats** - Gives additional strength and stiffness needed
- **25.4mm Top Tube** – The large Top Tube is very easy to hold onto, especially in long carries.
- **Durathene™ Netting** – Replaces the old-style chicken wire.
- **Exceeds 2500 lb. Military Strength Test**
